Mekelle, Tigray, Ethiopia

SKILLS

- SQL & Database Management
- Robotics & Prototyping
- Python Programming
- Event Organization
- Leadership & Teamwork
- Problem Solving & Project Development

EDUCATION

Kallamino Special High School (KSHS)

Mekelle, Ethiopia

High School Student
Grade 11 (Junior Year)

Relevant interests: STEM, Computer Science, Biology, Robotics, Technology

LANGUAGES

Tigrynga

English

Amharic

PROFILE

Motivated high school student interested in technology, STEM, community development, and youth leadership. Experienced in volunteering, organizing youth initiatives, collaborative problem-solving, and developing practical solutions to community challenges. Interested in using technology and education to create meaningful opportunities for young people and contribute to positive change in the community.

LEADERSHIP & COMMUNITY ENGAGEMENT

Free Health Initiative Ethiopia (FHI)

2025–2026

National Event Organizer — Board of Directors

- Supported the planning and organization of youth-focused health initiatives and events.
- Collaborated with other young people and organizers to coordinate activities and community engagement.
- Contributed to creating opportunities for young people to participate in health-related initiatives.

Vision 4 All Academy

Social Media Teaching Hub Editor

- Contributed to educational and youth-focused digital content.
- Worked with others to communicate learning opportunities and information to students.

Astrofy Club

Sub-Leader

- Supported club activities and encouraged student participation in astronomy and STEM-related learning.
- Worked with other student leaders to organize activities and engage members.

COMMUNITY PROJECTS

Brighter Generation Ethiopia

Technical Team Member — Community Innovation
Project

2025

- Identified a practical challenge associated with cactus fruit harvesting and explored ways to make the process safer and easier.
- Our Project was selected as National Project Winner.
- Worked as part of the technical team to build and develop the prototype.
- Collaborated with team members to test ideas, address design challenges, and improve the prototype.

Automatic Trash Can — Robotics Project

Project Team Leader

2026

- Worked on a robotics project focused on developing an automatic trash can.
- Applied basic programming, electronics, and problem-solving skills to develop the project.
- Collaborated with team members during the design and development process.

Biodegradable Plastic Project

Science Fair Project

2026

- Explored the development of biodegradable plastic using potato-based materials.
- Applied scientific investigation and experimentation to explore an environmentally focused alternative material.

PROGRAMS & FELLOWSHIPS

Yale Young African Scholars (YYAS)

Participant — 2026

- Selected for a competitive leadership and academic program for young African students.
 - Participated in sessions focused on leadership, education, personal development, and future opportunities.
-

YOUTH & COMMUNITY LEADERSHIP

She Plus Tech

Participant — 2026

- Completed Microsoft SQL Foundations training, developing skills in SQL and database management.
- Participated in technology, leadership, and professional development activities.

Python Training

Completed — 2026

- Completed a four-week Python beginner training program.
- Developed foundational programming and problem-solving skills.

Mekelle American Corner

Robotics Program Participant — 2025

- Completed a two-week robotics program.
- Gained practical exposure to robotics, problem-solving, and technology-based projects.

CERTIFICATIONS & ACHIEVEMENTS

- Yale Young African Scholars (YYAS) — Selected Participant, 2026
 - She Plus Tech — Participant; completed Microsoft SQL Foundations training, 2026
 - Python Programming Training — Certificate, 2026
 - Brighter Generation Ethiopia — 2025
 - Mekelle American Corner Robotics Program — Certificate, 2025
 - Science Fair — Participant in Robotics & Biology, 2026
-
